EXPERIENCE

Apple — Senior Frontend Software Engineer (Contract)

Santa Clara, CA | February 2023 - February 2024

- Led **React** development of new features in Apple's Special Project Group's internal tooling platform
- Created scalable, data-intensive, and responsive **React** web pages to enhance team productivity
- Designed, architected and implemented pixel perfect UIs with **Less** and other **CSS preprocessors**
- Added robust & reusable components to a shared component library for repeated use across multiple apps
- Developed and maintained **Node.js** backend **REST APIs** to support frontend features
- Created new APIs leveraging Hasura and accessing them through **GraphQL** queries

Reputation — Senior Frontend Software Engineer

San Francisco, CA | November 2021 - October 2022

- Led **React** development of new features to the Social platform, increasing customer reach to their audience
- Collaborated with Product, Management and QA teams to ship features quickly and effectively
- Created integrations with various Social platforms (TikTok, Twitter, Google Business Profile, Instagram/Facebook, LinkedIn)

Dolby.io — Full Stack Software Engineer

San Francisco, CA | August 2020 - October 2021

- Built new functionality and webpages using **React, Redux, styled-components**
- Created a new **Node.js** microservice to handle 3rd party integrations with our APIs

STRATIM — Full Stack Software Engineer

San Francisco, CA | January 2019 - March 2020

- Created new and optimized existing **Java REST API** endpoints for STRATIM's mobile application
- Built new features for STRATIM's **iOS** application, almost doubling its user base

Gliffy Inc. — Full Stack Software Engineer

San Francisco, CA | July 2017 - January 2019

- Partnered with Design/Product/Engineering to create new **Ember.js** webpages for the Gliffy web app
- Created a suite of **Node.js** microservices, increasing scalability and engineering efficiency and output
